	Does thi	is proposed regulation conform to the relevant international standard?	
	[]Yes [X]No		
	internat	describe, whenever possible, how and why it deviates from the ional standard: Brazilian MRLs are established based on scientific methodology at with international best practices. Countries usually set MRLs according to the	

Good Agricultural Practice (GAP) applicable to their region. Agricultural chemical use patterns differ between different production regions and countries as pests, diseases and environmental factors vary. This means that Brazilian MRLs for agricultural chemicals in food may differ from Codex standards. However, when a product differs from Brazilian MRLs, but is in conformity to Codex standards, it may be imported, provided that the risk assessment does not indicate an unacceptable risk to Brazilian consumers.
