<b>6.</b>	<p><b>Description of content:</b> Flupyradifurone is an approved active substance in Great Britain. An application was received by the Health and Safety Executive to set new MRLs for various commodities. Following assessment, new MRLs have been introduced to accommodate new authorisations of a plant protection product in Great Britain.</p> <p>The Evaluation Report/Reasoned Opinion supporting the new MRLs is available at the following link: <a href="#">The evaluation of new MRLs for flupyradifurone and the metabolite DFA in or on various commodities</a>.</p> <p>A complete list of the new MRLs is available within this document, see pages 7-11 and 104-106: <a href="#">GB MRL publications spreadsheet - pesticides - HSE</a>.</p> <p>The residue levels arising in food and feed, and in animal commodities from the notified uses result in consumer exposures below the toxicological reference values and therefore harmful effects on human health are not expected. As the residue levels exceed the current MRLs in force, new MRLs are being adopted.</p> <p>The MRL being set for honey is a temporary MRL; supplementary information is required and shall be submitted by: 6 March 2030.</p>
