6.	<b>Description of content:</b> Propamocarb is an approved active substance in Great Britain. An application was received by the Health and Safety Executive to set new MRLs for lamb's lettuce/corn salads (0251010), escaroles/broad-leaved endives (0251030), cresses and other sprouts and shoots (0251040), land cresses (0251050), red mustards (0251070) and baby leaf crops (including brassica species) (0251080). Following assessment, new MRLs have been introduced to accommodate new authorisations of plant protection products in Great Britain.  The Evaluation Report/ Reasoned Opinion supporting the new MRLs is available at the following link: <a href="#">The evaluation of new MRLs for propamocarb in or on various commodities.</a>  The residue levels arising in food from the notified uses result in consumer exposures below the toxicological reference values, and therefore harmful effects on human health are not expected. As the residue levels exceed the current MRLs in force, new MRLs are being adopted.
