| 6. | <b>Description of content:</b> This Regulation authorises for the first time in the European Union and for a period of ten years L-arginine produced with <i>Corynebacterium glutamicum</i> KCCM as a feed additive belonging to the additive category 'sensory additives', functional group 'flavouring compounds'. This authorisation is based on the favourable conclusions of a scientific assessment of the dossier submitted by the applicant, conducted by the European Food Safety Authority (EFSA). The terms of the authorisation are detailed in the Annex to the Act.                                                                                                                                                                                                                                                                         |
