6.	<b>Description of content:</b> This regulation establishes a tolerance for residues of permethrin in or on the food and feed commodities of dragon fruit (pitaya) as well as crop group expansions to field corn subgroup 15-22C and sweet corn subgroup 15-22D, and crop group conversions to leafy greens subgroup 4-16A, including tolerances for arugula, garden cress, and upland cress.

EPA considers the

<p>international maximum residue limits (MRLs) established by the Codex Alimentarius Commission (Codex), as required by FFDCA section 408(b)(4).</p> <p>The Canadian and Codex MRLs are expressed in terms of total permethrin. The US residue definition is harmonized with Canada and Codex. Mexico adopts US tolerances. When the US tolerance is higher, harmonization is not feasible because the tolerances are based on field trial data that resulted in residues that necessitated the higher limit. For some cases, such as corn grain, EPA establishes a different US tolerance (0.05 ppm) than the Codex tolerance (2 ppm) due to differences in use patterns.</p>
