

NOTIFICATION

Corrigendum

The following communication, received on 9 April 2026, is being circulated at the request of the Delegation of Canada.

Proposed Maximum Residue Limit for Isocycloseram (PMRL2026-03): Correction

This corrigendum concerns the raw agricultural commodities indicated in section 6 of the notification [G/SPS/N/CAN/1632](#), in English and French. The notification reports the maximum residue limits (MRLs) proposed by Health Canada's Pest Management Regulatory Agency (PMRA) as:

<u>MRL (ppm)¹</u>	<u>Raw Agricultural Commodity (RAC) and/or Processed Commodity</u>
10	Leafy vegetables (crop group 4-13), except head lettuce
4.0	<i>Brassica</i> head and stem vegetable group (crop group 5-13)
2.0	Dried tomatoes
1.5	Dried prune plums
1.0	Stone fruits (crop group 12-09)
0.6	Fruiting vegetables (crop group 8-09)
0.5	Almond oil
0.4	Pome fruits (crop group 11-09)
0.2	Tree nuts (crop group 14-11)
0.15	Cucurbit vegetables (crop group 9); dry soybeans
0.01	Tuberous and corm vegetables (crop subgroup 1C); dry lentils, head lettuce, peanuts

¹ ppm = parts per million

This corrigendum amends an error in section 6 of the original notification. That document inadvertently omitted to include proposed MRLs for the following raw agricultural commodities:

<u>MRL (ppm)¹</u>	<u>Raw Agricultural Commodity (RAC) and/or Processed Commodity</u>
0.01	Field corn, popcorn grain

¹ ppm = parts per million
