<b>6. Description of content:</b> The proposed draft Regulation concerns the review of existing Maximum Residue Levels (MRLs) for carbofuran, imazalil, mandipropamid, propaquizafop, quizalofop-P-ethyl and quizalofop-P-tefuryl in certain food commodities. Based on the European Food Safety Authority risk assessment MRLs for these substances in certain commodities are lowered, while some MRLs will be raised.
<b>7. Objective and rationale:</b> <input checked="" type="checkbox"/> <b>food safety</b> , <input type="checkbox"/> <b>animal health</b> , <input type="checkbox"/> <b>plant protection</b> , <input type="checkbox"/> <b>protect humans from animal/plant pest or disease</b> , <input type="checkbox"/> <b>protect territory from other damage from pests.</b>
<b>8. Is there a relevant international standard? If so, identify the standard:</b> <input checked="" type="checkbox"/> <b>Codex Alimentarius Commission (e.g. title or serial number of Codex standard or related text):</b> Codex Maximum Residue Limits for pesticides imazalil and mandipropamid in some commodities. **Does this proposed regulation conform to the relevant international standard?**

[ ] Yes [X] No

**If no, describe, whenever possible, how and why it deviates from the international standard:** The European Food Safety Authority published reasoned opinions on the existing MRLs for carbofuran, imazalil, mandipropamid, propaquizafop, quizalofop-P-ethyl and quizalofop-P-tefuryl. Based on these opinions, Regulation (EC) No 396/2005 should be amended following a risk analysis approach.

In addition, Codex Alimentarius Committee revoked all CXLs for carbofuran in 2024.

The current EU policy is to align EU MRLs with CXLs if the following conditions are fulfilled: (i) that the European Union sets MRLs for the commodity under consideration; (ii) that the current EU MRL is lower than the CXL; and (iii) that the CXL is acceptable to the European Union with respect to its policy objective of ensuring a high level of consumer protection, including aspects on supporting data and extrapolations.

Where the European Union considers that a proposed CXL is not acceptable, it makes a reservation to the Codex Committee on Pesticide Residues (CCPR). Reservations made by the European Union, concerning some of the active substances envisaged by the draft Regulation, are listed in the relevant CCPR reports:
