NOTIFICATION

Corrigendum

The following communication, received on 20 May 2026, is being circulated at the request of the Delegation of the European Union.

Labelling of premixtures

L-arginine produced with *Corynebacterium glutamicum* KCCM 80387 was authorised for ten years as a feed additive for all animal species by Commission Implementing Regulation (EU) 2025/1787 notified on 17 September 2025 as G/SPS/N/EU/883.

In the Annex to Implementing Regulation (EU) 2025/1787, the third point in the column 'Other provisions' of the table concerning the authorisation of L-arginine produced with *Corynebacterium glutamicum* KCCM 80387 erroneously requires that the recommended maximum content of the active substance is indicated on the label of the additive and premixture. The recommended maximum content of the active substance should be indicated only on the label of the additive. Implementing Regulation (EU) 2025/1787 is therefore corrected accordingly by Commission Implementing Regulation (EU) 2026/1011.
