<p>6. Description of content: The Food Safety and Inspection Service (FSIS) is proposing to amend the egg products inspection regulations by requiring official plants that process egg products (herein also referred to as "egg products plants" or "plants") to develop and implement Hazard Analysis and Critical Control Point (HACCP) Systems and Sanitation Standard Operating Procedures (Sanitation SOPs) and to meet other sanitation requirements consistent with the meat and poultry regulations. FSIS is proposing to eliminate those current regulatory provisions that are inconsistent with HACCP, Sanitation SOPs, and the proposed sanitation requirements. FSIS is also proposing to specify in the regulations that official plants are required to process egg products to be edible without additional preparation to achieve food safety.</p> <p>In addition, FSIS is proposing to: Provide for generic approval as part of the prior label approval system for egg products; make changes to labeling requirements for shell eggs consistent with those in the Food and Drug Administration's (FDA's) regulations; require special handling instructions on egg products; eliminate the requirements for prior approval by FSIS of egg products plant drawings, specifications, and equipment; incorporate egg products plants into the coverage of the "Rules of Practice" that the Agency follows when initiating administrative enforcement actions; and change the Agency's interpretation of the requirement for continuous inspection in agency law.</p> <p>FSIS is also announcing that it is seeking public comment on draft guidance designed to help small and very small plants producing egg products to meet the new regulatory requirements being proposed in this rulemaking. Should the rule become final, FSIS intends to finalize this guidance.</p>
