6.	Description of content: Health Canada's Food Directorate completed a detailed safety assessment of a food additive submission seeking approval for the use of lipase from <i>Ogataea polymorpha</i> B14-CBSsynt in bread, flour, whole wheat flour, unstandardized bakery products, and pasta. Lipase from other source organisms is already permitted for use in Canada as a food enzyme in the same foods as those requested by the petitioner, other than pasta. As no safety concerns were identified through Health Canada's assessment, the Department has enabled the use of the food additive lipase from <i>O. polymorpha</i> B14-CBSsynt, as described in the information document below, by modifying the <i>List of Permitted Food Enzymes</i> (https://www.canada.ca/en/health-canada/services/food-nutrition/food-safety/food-additives/lists-permitted/5-enzymes.html), effective 19 November 2018.
