6. Description of content: The proposed draft Regulation concerns the review of existing MRLs for clethodim, dazomet, hexythiazox, metam and sethoxydim in certain food commodities. MRLs for these substances in certain commodities are changed: either increased or lowered. Lower MRLs are set after updating the limits of determination and/or deleting old uses which are not authorised any more in the European Union or for which a human health concern may not be excluded. The residue definition for some substances has also been updated.

Objective and rationale: <input checked="" type="checkbox"/> food safety , <input type="checkbox"/> animal health , <input type="checkbox"/> plant protection , <input type="checkbox"/> protect humans from animal/plant pest or disease , <input type="checkbox"/> protect territory from other damage from pests.

8. Is there a relevant international standard? If so, identify the standard:

Codex Alimentarius Commission (e.g. title or serial number of Codex standard or related text): Codex Maximum Residue Limits for clethodim and Codex Maximum Residue Limits for hexythiazox. The list of Codex MRLs is available at:

<http://www.fao.org/fao-who-codexalimentarius/codex-texts/dbs/pestres/pesticides/en/>.

World Organization for Animal Health (OIE) (e.g. Terrestrial or Aquatic Animal Health Code, chapter number):

International Plant Protection Convention (e.g. ISPM number):

None

Does this proposed regulation conform to the relevant international standard?

Yes No

If no, describe, whenever possible, how and why it deviates from the international standard: The European Food Safety Authority published reasoned opinions on the review of the existing maximum residue levels for clethodim and for hexythiazox. Based on these opinions, Regulation (EC) No 396/2005 should be amended accordingly.
