5. Title of the notified document: Commission Implementing Regulation (EU) 2021/2093 of 29 November 2021 concerning the authorisation of disodium 5'-guanylate as a feed additive for all animal species (Text with EEA relevance). Language(s): English, French and Spanish. Number of pages: 4 https://members.wto.org/crnattachments/2021/SPS/EEC/21_7421_00_e.pdf https://members.wto.org/crnattachments/2021/SPS/EEC/21_7421_00_f.pdf https://members.wto.org/crnattachments/2021/SPS/EEC/21_7421_00_s.pdf
6. Description of content: Regulation (EC) No 1831/2003 provides for the authorisation of additives for use in animal nutrition and for the grounds and procedures for granting such authorisation. In accordance with Article 7 of Regulation (EC) No 1831/2003 an application was submitted for the authorisation of disodium 5'-guanylate. That application was accompanied by the particulars and documents required under Article 7(3) of Regulation (EC) No 1831/2003. The application concerns the authorisation of disodium 5'-guanylate as a feed additive for all animal species, to be classified in the category 'sensory additives' and in the functional group 'flavouring compounds'. The applicant requested disodium 5'-guanylate to be authorised also for use in water for drinking. However, Regulation (EC) No 1831/2003 does not allow the authorisation of 'flavouring compounds' for use in water for drinking. Therefore, the use of disodium 5'-guanylate in water for drinking should not be allowed. The European Food Safety Authority ('the Authority') concluded in its opinion of 5 May 2021 that, under the proposed conditions of use, disodium 5'-guanylate does not have adverse effects on animal health, human health or the environment. The Authority further concluded that disodium 5'-guanylate is efficacious to contribute to the flavour of feed. The Authority also verified the report on the methods of analysis of the feed additive in feed submitted by the Reference Laboratory set up by Regulation (EC) No 1831/2003. The assessment of disodium 5'-guanylate shows that the conditions for authorisation, as provided for in Article 5 of Regulation (EC) No 1831/2003, are satisfied. Accordingly, the use of that substance should be authorised as specified in the Annex to this Regulation.
