5. Title of the notified document: Commission Implementing Regulation (EU) 2022/1383 of 8 August 2022 concerning the authorisation of olibanum extract from <i>Boswellia serrata</i> Roxb. ex Colebr. as a feed additive for horses and dogs (Text with EEA relevance). Language(s): English, French and Spanish. Number of pages: 5 https://members.wto.org/crnattachments/2022/SPS/EEC/22_5413_00_e.pdf https://members.wto.org/crnattachments/2022/SPS/EEC/22_5413_00_f.pdf https://members.wto.org/crnattachments/2022/SPS/EEC/22_5413_00_s.pdf
6. Description of content: Regulation (EC) No 1831/2003 provides for the authorisation of additives for use in animal nutrition and for the grounds and procedures for granting such an authorisation. Article 10(2) of that Regulation provides for the re-evaluation of additives authorised pursuant to Council Directive 70/524/EEC. Olibanum extract was authorised without a time limit in accordance with Directive 70/524/EEC as a feed additive for all animal species. That additive was subsequently entered in the Register of feed additives as an existing product, in accordance with Article 10(1)(b) of Regulation (EC) No 1831/2003. In accordance with Article 10(2) of Regulation (EC) No 1831/2003 in conjunction with Article 7 thereof, an application was submitted for the re-evaluation of olibanum extract from <i>Boswellia serrata</i> Roxb. ex Colebr. for horses and dogs. The applicant requested the additive to be classified in the additive category 'sensory additives' and in the functional group 'flavouring compounds'. That application was accompanied by the particulars and documents required under Article 7(3) of Regulation (EC) No 1831/2003. The European Food Safety Authority ('the Authority') concluded in its opinion of 27 January 2022 that, under the proposed conditions of use, olibanum extract from <i>Boswellia serrata</i> Roxb. ex Colebr. does not have adverse effects on animal health, consumer health or the environment. The Authority also concluded that olibanum extract from <i>Boswellia serrata</i> Roxb. ex Colebr. should be considered as a non-irritant to skin and eyes, but in the absence of data, no conclusion could be drawn on its potential to be a dermal and respiratory sensitiser. Therefore, the Commission considers that appropriate protective measures should be taken to prevent adverse effects on human health, in particular as regards the users of the additive.
