5. Title of the notified document: Notice of Modification to the <i>List of Permitted pH Adjusting Agents, Acid-Reacting Materials and Water Correcting Agents</i> to Extend the Use of Malic Acid to Honey Wine. Language(s): English and French. Number of pages: 3 https://members.wto.org/crnattachments/2022/SPS/CAN/22_6676_00_e.pdf https://members.wto.org/crnattachments/2022/SPS/CAN/22_6676_00_f.pdf
6. Description of content: Health Canada's Food Directorate completed a premarket safety assessment of a food additive submission seeking approval for the use of malic acid in honey wine including honey wine to which fruits are added, and mead. Malic acid is already permitted for use in Canada as a pH adjusting agent in various food categories, including 'grape' wine and unstandardized foods (such as mead, and honey wine with added fruits) at a maximum level of use consistent with Good Manufacturing Practice. The results of the premarket assessment support the safety of malic acid for its requested use in honey wine. Consequently, Health Canada has enabled the use of malic acid described in the information document by modifying the <i>List of Permitted pH Adjusting Agents, Acid-Reacting Materials and Water Correcting Agents</i> , effective 23 September 2022. The purpose of this communication is to publically announce the Department's decision in this regard and to provide the appropriate contact information for those wishing to submit an inquiry or new scientific information relevant to the safety of this food additive.
