NOTIFICATION

Addendum

The following communication, received on 19 June 2023, is being circulated at the request of the Delegation of Canada.

Established Maximum Residue Limit: Mefentrifluconazole

The proposed maximum residue limit (PMRL) document for mefentrifluconazole notified in G/SPS/N/CAN/1494 (dated 21 March 2023) was adopted 14 June 2023. The proposed MRL was established via entry into the Maximum Residue Limits Database and is provided directly below:

MRL (ppm)¹ Raw Agricultural Commodity (RAC) and/or Processed Commodity

0.15 Legume vegetables (crop group 6-21), except dry lentils and dry soybeans²

¹ ppm = parts per million

² The previously established MRL of 0.15 ppm for crop group 6 (except dry lentils and dry soybeans) is extended to include all commodities in crop group 6-21 (except dry lentils and dry soybeans). The MRLs already established for dry lentils and dry soybeans at 2.0 ppm and 0.4 ppm, respectively, will not change as a result of this PMRL action.

The commodities included in the listed crop groups/subgroups can be found on the *Residue Chemistry Crop Groups* webpage (<https://www.canada.ca/en/health-canada/services/consumer-product-safety/pesticides-pest-management/public/protecting-your-health-environment/pesticides-food/residue-chemistry-crop-groups.html>) in the Pesticides section of the Canada.ca website.

MRLs established in Canada may be found using Health Canada's *Maximum Residue Limit Database* (<https://pest-control.canada.ca/pesticide-registry/en/mrl-search.html>) on the *Maximum Residue Limits for Pesticides* webpage (<https://www.canada.ca/en/health-canada/services/consumer-product-safety/pesticides-pest-management/public/protecting-your-health-environment/pesticides-food/maximum-residue-limits-pesticides.html>). The database allows users to search for pesticides or for food commodities.
