<b>6. Description of content:</b> Health Canada's Food Directorate completed a premarket safety assessment of a food additive submission seeking approval for the use of lipase from <i>Saccharomyces cerevisiae</i> LALL-LI in bread, flour, whole wheat flour and unstandardized bakery products.  Lipase from other sources is already permitted for use in Canada in the foods requested by the petitioner. However, prior to this Notice, the source organism, <i>S. cerevisiae</i> LALL-LI, was not a permitted source for any food enzyme in Canada.  The results of the premarket assessment support the safety of lipase from <i>S. cerevisiae</i> LALL-LI for its requested uses. Consequently, Health Canada has enabled the use of lipase from <i>S. cerevisiae</i> LALL-LI as described in the information document by modifying the <i>List of Permitted Food Enzymes</i> , effective September 13, 2023.  The purpose of the information document is to publicly announce the Department's decision in this regard and to provide the appropriate contact information for those wishing to submit an inquiry or new scientific information relevant to the safety of this food additive.
