Committee on Sanitary and Phytosanitary Measures

## NOTIFICATION

If applicable, name of local government involved:         2. Agency responsible: Food Standards Australia New Zealand (FSANZ)         3. Products covered (provide tariff item number(s) as specified in national schedules deposited with the WT0; ICS numbers should be provided in addition, where applicable): Foods sold in New Zealand (both imported and domestically produced)         4. Regions or countries likely to be affected, to the extent relevant or practicable:       [X] All trading partners         [] Specific regions or countries:       5.         5. Title of the notified document: Approval report for Application A1268 - Steviol glycosides produced by bicconversion using new enzymes produced by GM Escherichia coli. and Supporting Document 1 Risk and Safety Assessment. Language(s): English. Number of pages: 43         https://www.foodstandards.gov.au/code/applications/Pages/A1268Steviol-glycosides-produced-by-bioconversion-using-new-enzymes-produced-by-GM-Escherichia-coli.aspx         6. Description of content: FSANZ has approved amendments to the Australia New Zealand Food Standards Code (the Code) to permit the bioconversion method of producing specific steviol glycosides, rebaudioside M and rebaudioside I. The use predictally purpose. The bioconversion method of production is consistent with Codex standards. The enzymes used and their sources are very similar but not identical to those listed in the Joint FAO/WHO Expert Committee on Food Additives (JECFA) specifications for steviol glycosides, being the context of the following objectives: and 1 the protection of public health and safety; (b) the provision of adequate information relating to food to enable consumers to make informed choices; and (c) the prevention of misleading or deceptive conduct.	1.
