NOTIFICATION

Addendum

The following communication, received on 14 December 2023, is being circulated at the request of the Delegation of <u>Canada</u>.

Established Maximum Residue Limit: Pydiflumetofen

The proposed maximum residue limit (PMRL) document for pydiflumetofen notified in G/SPS/N/CAN/1529 (dated 19 September 2023) was adopted 13 December 2023. The proposed MRL was established via entry into the Maximum Residue Limits Database and is provided directly below:

<u>MRL (ppm)¹</u> Raw Agricultural Commodity (RAC) and/or Processed Commodity

10 Leaves of root and tuber vegetables (human food or animal feed) (crop group 2, except garden beet tops², radish leaves³ and turnip greens³)

¹ ppm = parts per million

- ² Garden beet tops are excluded from this MRL action as an MRL of 10 ppm is already established for this commodity.
- ³ Radish leaves and turnip greens are excluded from this MRL action as an MRL of 50 ppm is already established for these commodities.

The commodities included in the listed crop groups/subgroups can be found on the *Residue Chemistry Crop Groups* webpage <u>https://www.canada.ca/en/health-canada/services/consumer-product-safety/pesticides-pest-management/public/protecting-your-health-environment/pesticides-food/residue-chemistry-crop-groups.html in the Pesticides section of the Canada.ca website.</u>

MRLs established in Canada may be found using Health Canada's *Maximum Residue Limit Database* <u>https://pest-control.canada.ca/pesticide-registry/en/mrl-search.html</u> on the *Maximum residue limits, human health, and food safety* webpage <u>https://www.canada.ca/en/health-canada/services/consumer-product-safety/pesticides-pest-management/public/protecting-your-health-environment/pesticides-food/maximum-residue-limits-pesticides.html.</u>

The database allows users to search for pesticides or for food commodities.
