 - (a) an official statement that all of the following conditions have been fulfilled:
 - (i) The mother plants of the specified seeds concerned have been produced in a production site where the ToBRFV is known not to occur, on the basis of official inspections carried out at the appropriate time to detect ToBRFV;
 - (ii) in the case of a specified seed lot originating from more than 30 mother plants, that specified seed lot, prior to processing, has been analysed using the RT-PCR method and found to be free from the ToBRFV according to these tests;
 - (iii) in the case of a specific seed lot originating from less than or equal to 30 mother plants, analyses using the RT-PCR method have been carried out on the specified seeds, or on each individual mother plant of those specified seeds and specified seeds or mother plants have been found, according to those analyses, to be free from the ToBRFV;
 - (b) information ensuring the traceability of the production site of the mother plants.
